	5	Palm Sedge	<i>Carex muskingumensis</i>	2'-3'	18"	June-Sept
	3	White Turtlehead	<i>Chelone glabra</i>	2'-3'	2'	Aug-Oct
	5	Great Blue Lobelia	<i>Lobelia siphilitica</i>	2'-3'	18"	July-Sept

GRAPHIC SCALE

1 inch = 4 feet

PLANTING NOTES

- If your rain garden is a different shape than shown on this plan, that's ok. These notes will help you place the plants in the right spots.
- Keep plants within the dashed line of the basin in that area as they are best suited for the soil moisture conditions.
- Consider where you will view the garden from when placing plants.
- Plant in clusters or groups of 3 or more.
- Put shorter plants near the outer edge.
- Put taller plants near the back or center.
- Use the plant list as a guide for heights. It is organized from shortest to tallest plants.
- Have fun. Don't stress. Enjoy your new garden and pollinator guests!
