

MONTIE

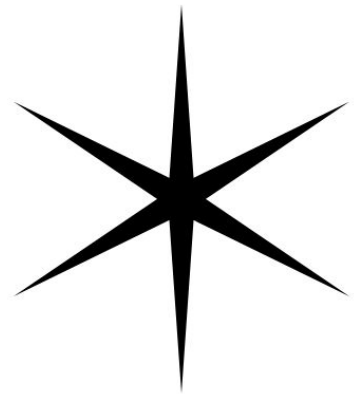

A story about
raingardens

the Monarch

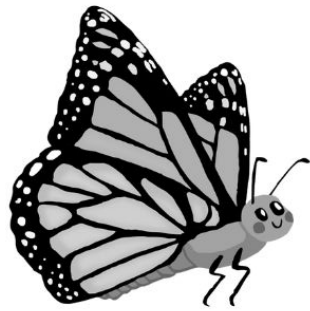

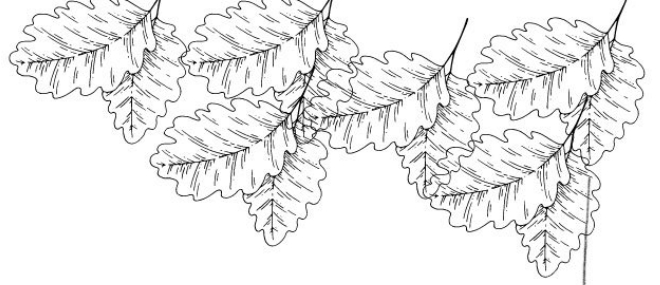

Metro Blooms Environmental
and Social justice Advocates,
2023

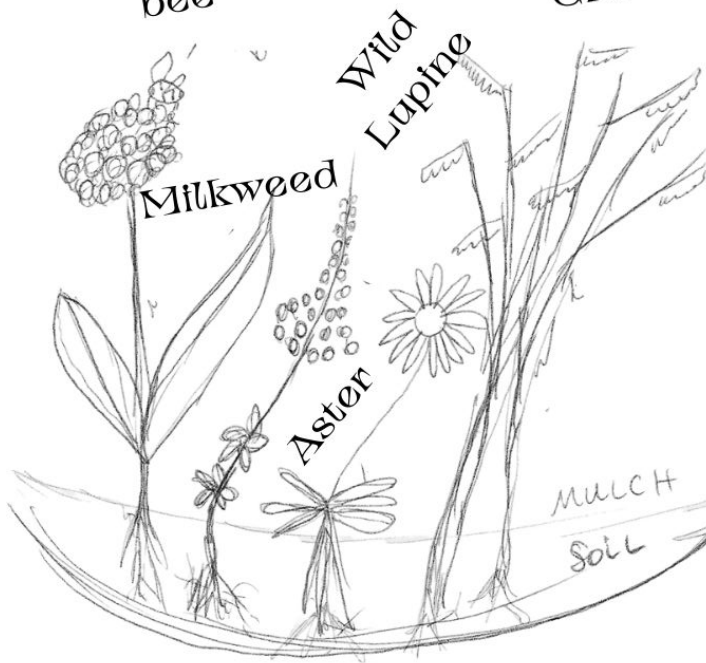

I am Montie the
Monarch butterfly.

You may see me here,
you may see me there,
I am everywhere!

Rusty patched bumble
bee

Blue
Gramma

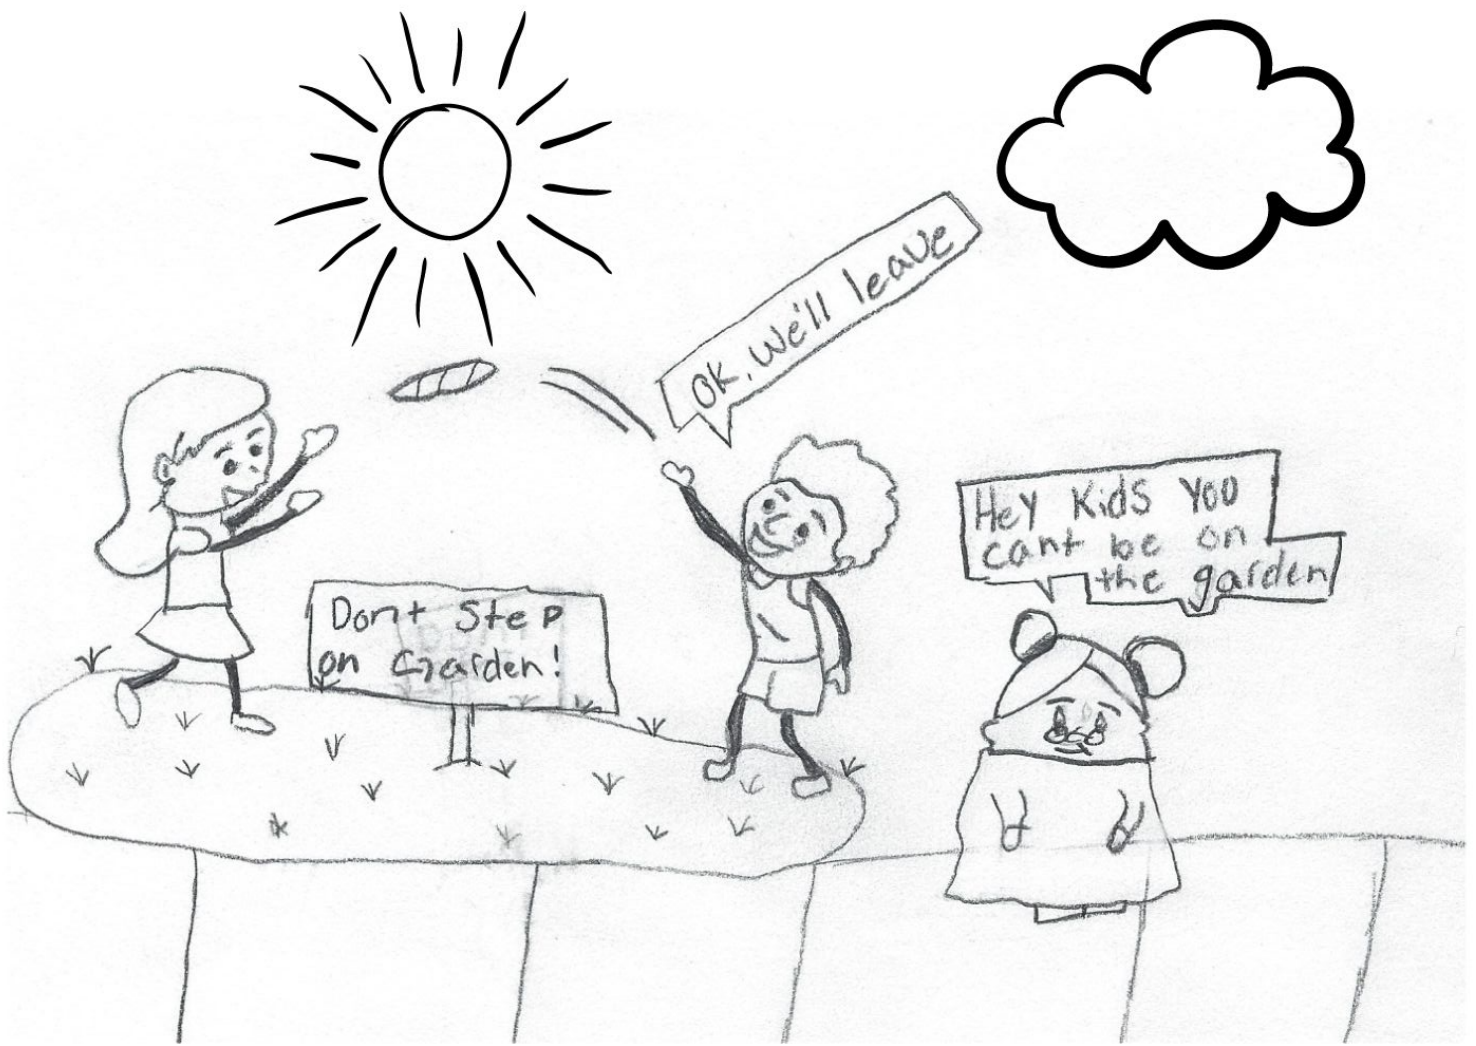

I'm an Oak tree.
I'm for pollinators.
too!

my favorite place to be
is in the garden at the
bottom of your tree

Where the
flowers lay
and the endless
pollen is here to
stay

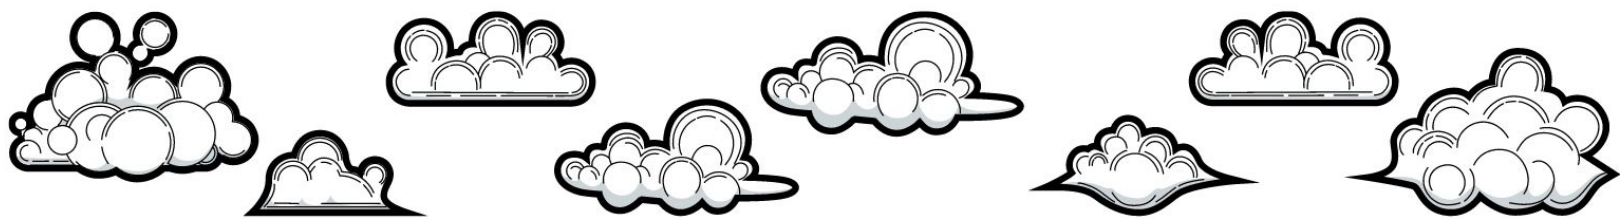

You will love it too!

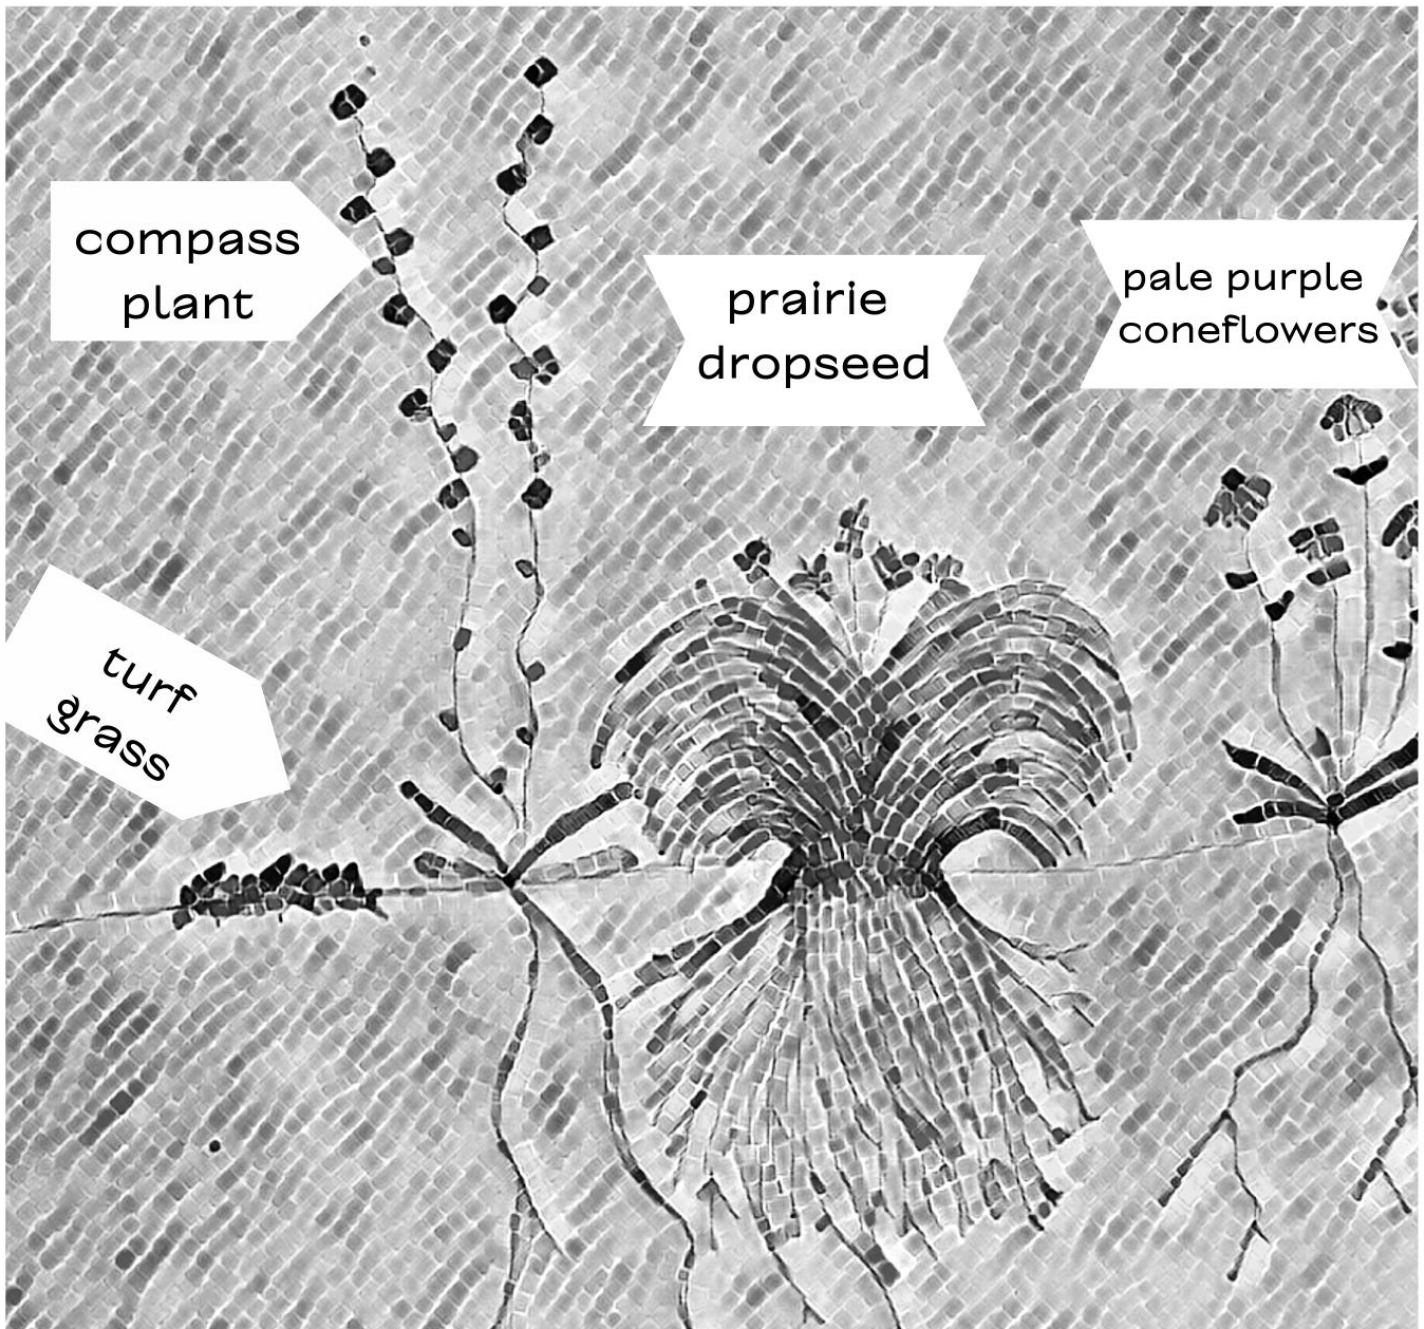

just don't step on it
with your shoe

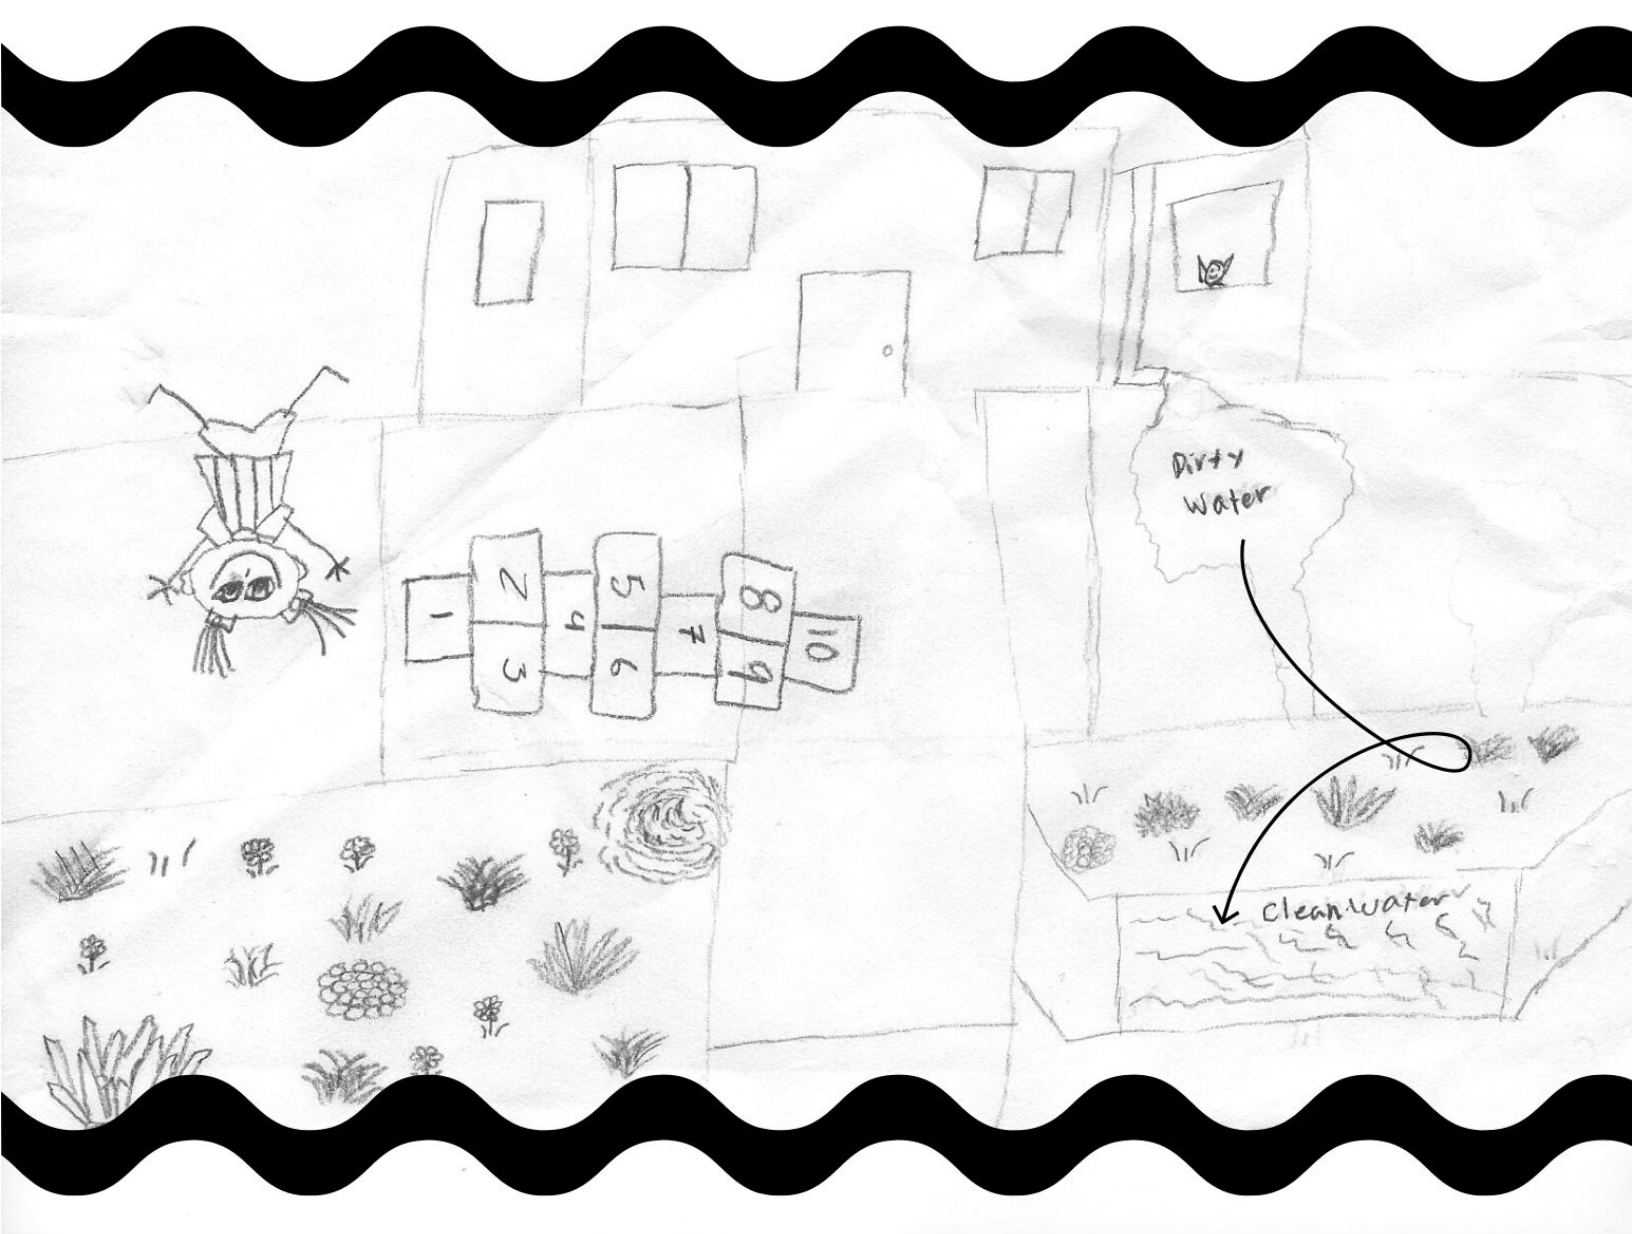

The garden brings together the
bugs
We move the pollen and give
hugs

4-8 inches deep
make sure the edges
aren't too steep

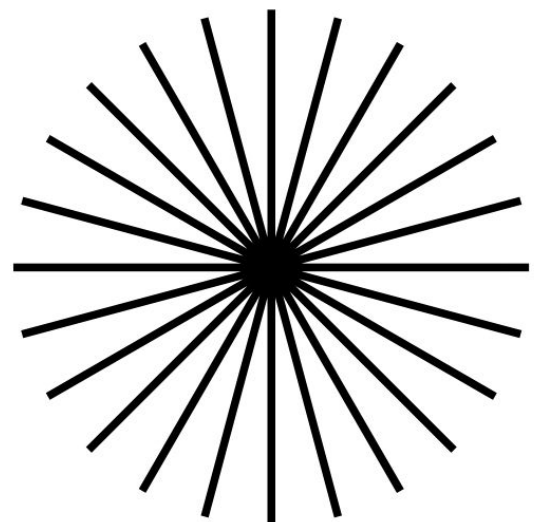

A bowl shape helps the
water flow and get low

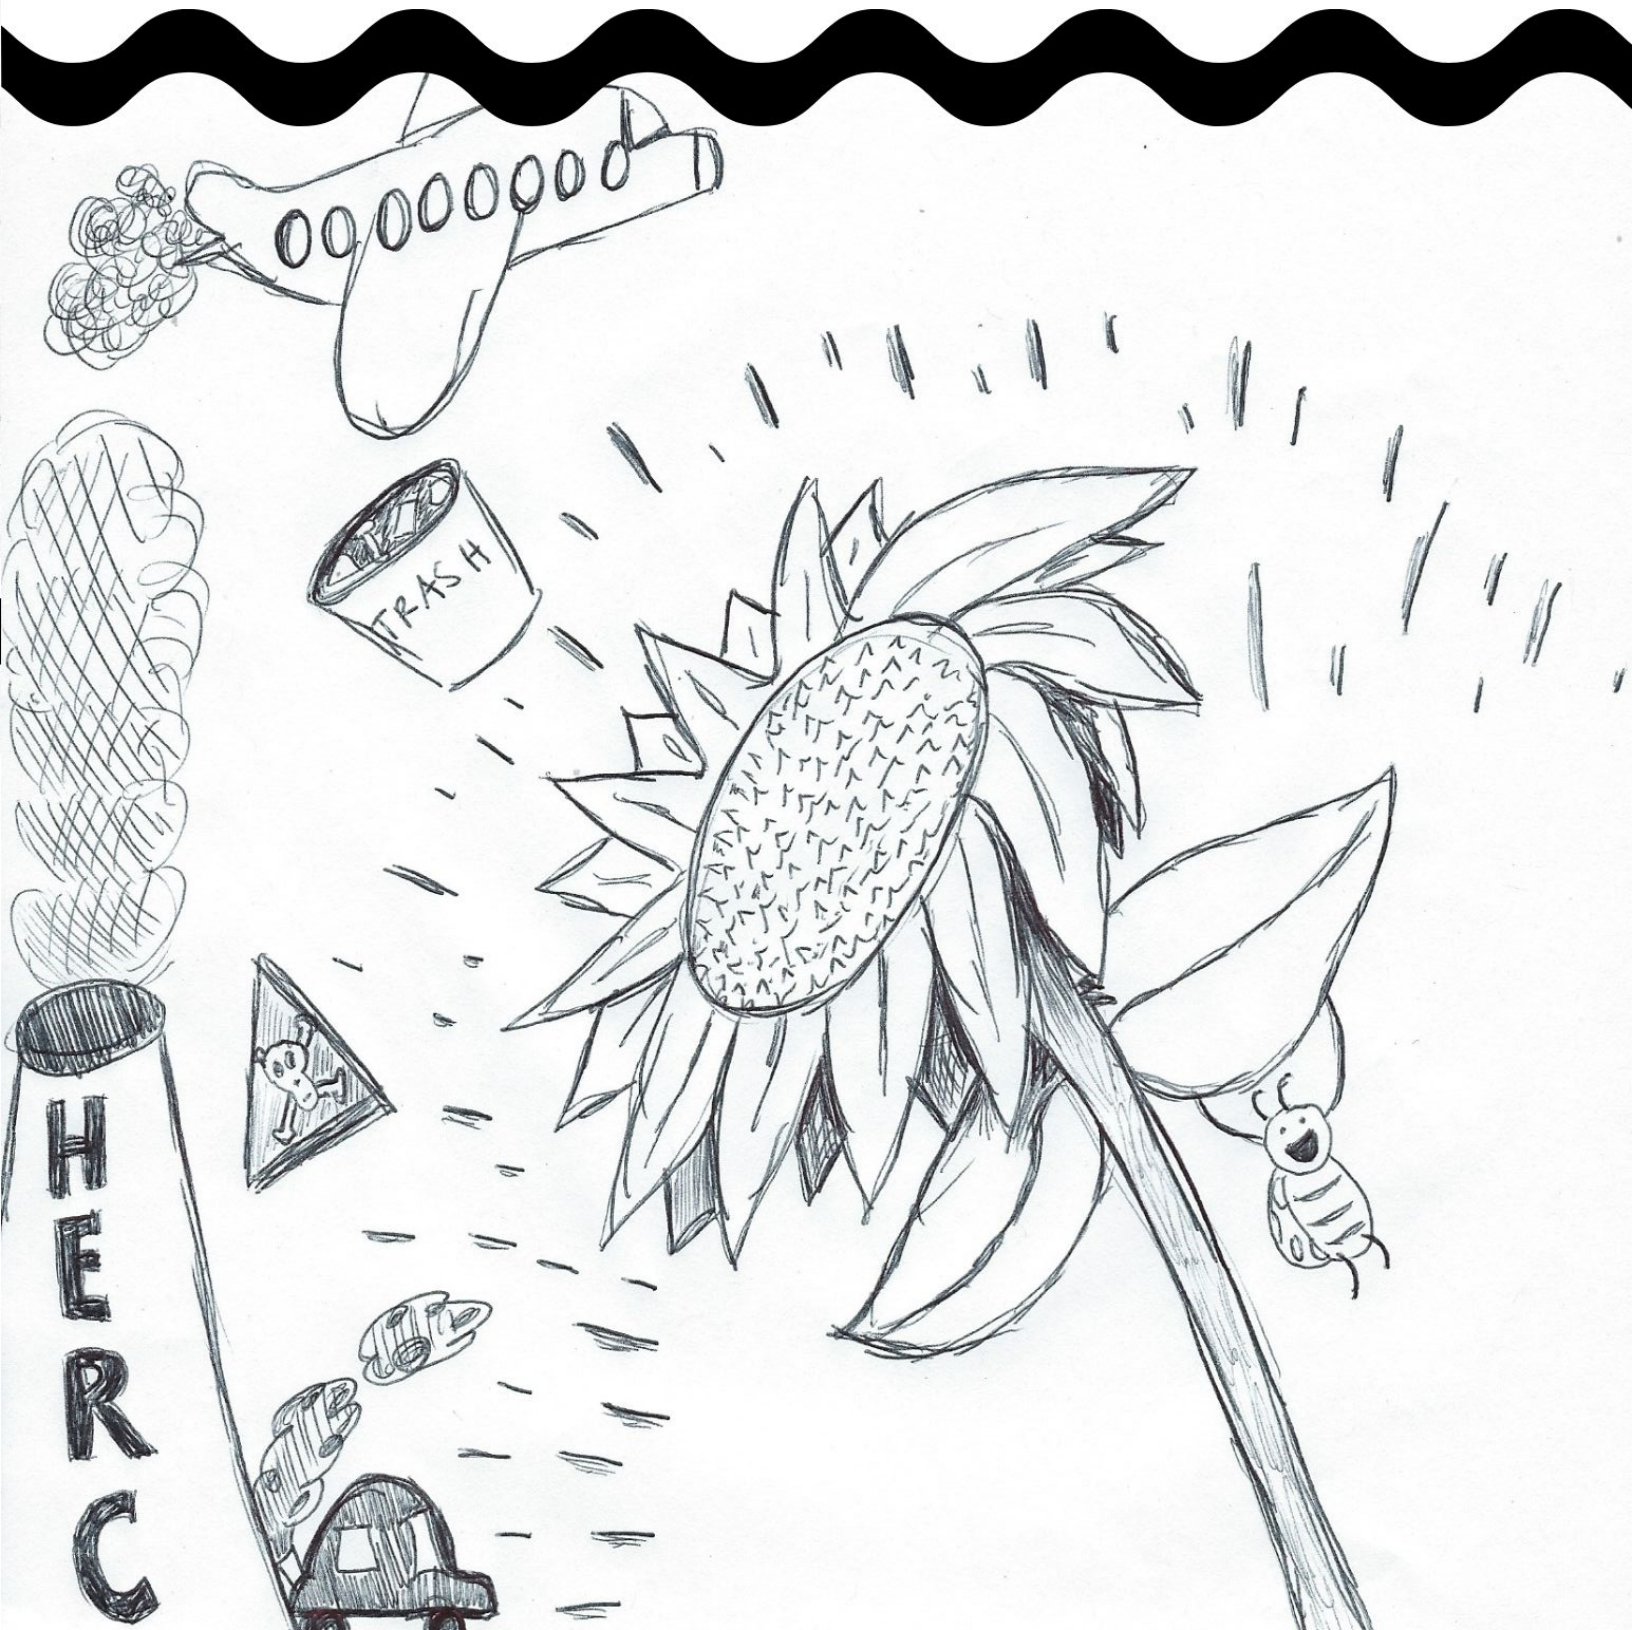

**THE WATER GOES
IN SUPER MUCKY**

**IT COMES OUT
CLEAR AND NOT
AT ALL YUCKY**

USE PLANTS WITH
REALLY LONG ROOTS
let's build a garden
and don't pollute

A decorative border in the top-left corner featuring a line drawing of roses and leaves.

We hope to see
you really soon
As the flowers
continue to
bloom!
